

SKYTRAK - EXIT POSITION OPTIONS

v4

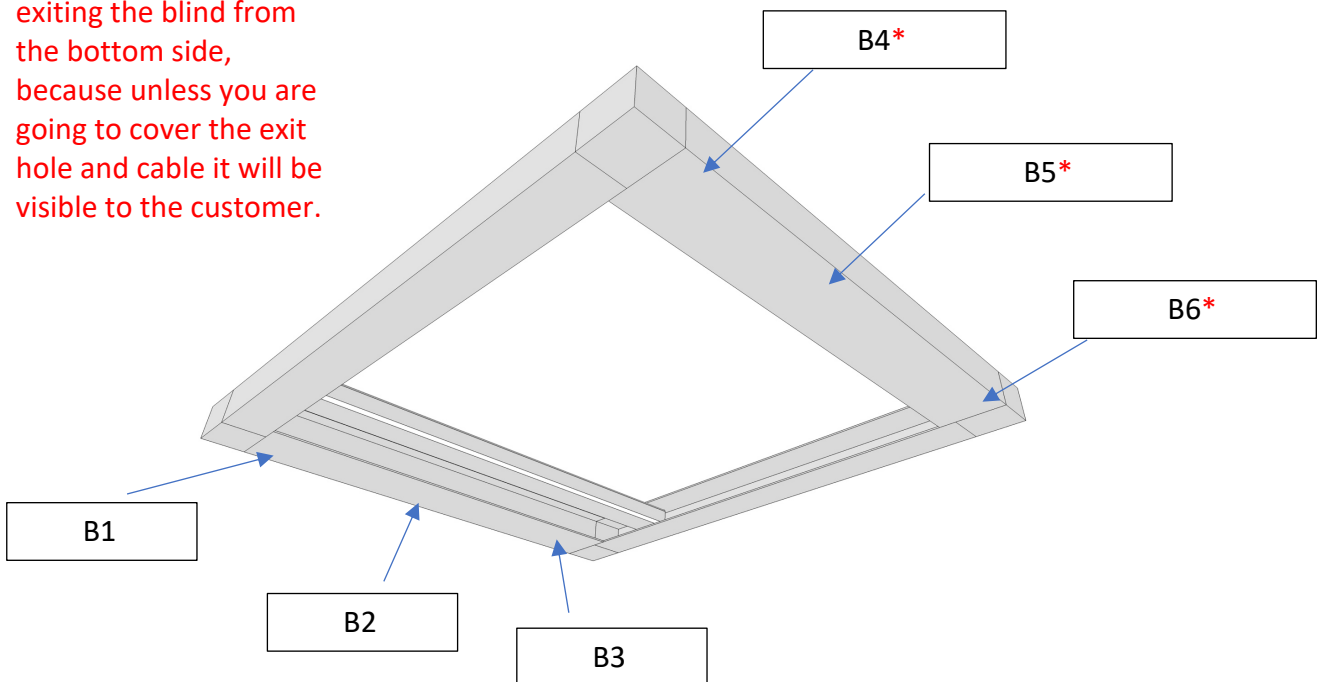

The recommended positions for all specifications are T1, T2, T3

TOP VIEW (top side of the blind/glass side)

BOTTOM VIEW (bottom side of the blind/floor side)

We do not recommend exiting the blind from the bottom side, because unless you are going to cover the exit hole and cable it will be visible to the customer.

* T4-6, B4-6 NOTES

240v – The transformer will need to be mounted externally; it cannot be hidden in the blind.

Battery – The battery pack will need to be mounted externally; it cannot be hidden in the blind.
